DEPLETED SOURCE RETURN POLICY

Frontier Technology Corporation will accept the return of depleted sources under the following applicable regulatory guidelines and operating policies of Frontier Technology Corporation:

- Returned sources must be a Frontier Technology Corporation fabricated source (s/n FTC-CF-XXXX). All other manufacturer's sources will be returned back to the customer at the customer's expense.
- The customer must submit a request to return a source and receive written acceptance prior to shipping the source to Frontier Technology Corporation.
- The returned source must be radiologically clean (must not have been used in a nuclear reactor or other device which has caused significant activation of the capsule material).
- The returned source must be suitable for shipment by common carrier.
- The source must be returned in a Type A shipping container, preferably a shipping container manufactured by Frontier Technology Corporation. Shipping containers from other manufacturers will be returned to the customer at their cost. If needed, Frontier can furnish a shipping container at no charge; however the customer will be responsible for all shipping costs.
- Customer is responsible for all shipping costs, custom clearance fees, forwarding fees, and any other fees/costs associated with the shipment of the returned source. (Frontier Technology's custom broker fees will be billed to the customer.)

Frontier Technology Corporation does not charge a "return fee" to receive any FTC depleted source.

If you have any questions, please call Frontier Technology Corporation for further information.
